

NAVACHNA FOUNDATION

FOR ENTREPRENEURSHIP DEVELOPMENT

PROMOTED BY:

I.T.S ENGINEERING COLLEGE,
GREATER NOIDA - Uttar Pradesh,
201310 - INDIA

OUR COLLABORATORS

About Our Incubation

I.T.S Engineering College established in 2006, offers a wide range of **engineering and management courses** and has graduated **over 20,000 students till date**. In **2015, the college received the MSME Business Incubation Centre** to promote innovation and entrepreneurship ecosystem. Furthering its commitment to entrepreneurship, in **2020, I.T.S established a Section 8 company, Navrachna Foundation for Entrepreneurship Development**, as a subsidiary of I.T.S Engineering College, Greater Noida. This platform **assists young entrepreneurs** in commercializing their technologies while also providing them with opportunities to showcase and test their abilities in running a startup business.

OUR VISION :

To be a leading educational institution that provides a transformative education to create technically competent and socially responsible professionals and innovators.

OUR MISSION :

- To accomplish excellence in the field of Technical Education through rigorous coursework based on the needs of society and industry.
- To impart advanced and contemporary technical skills to turn students into potential professionals.
- To develop potential Engineers and Managers by enhancing their technical skills and research capabilities to become successful innovators and entrepreneurs.
- To inculcate professionalism, leadership and business acumen amongst students in a dynamic business environment.

GOVERNMENT SCHEMES & SUPPORTS

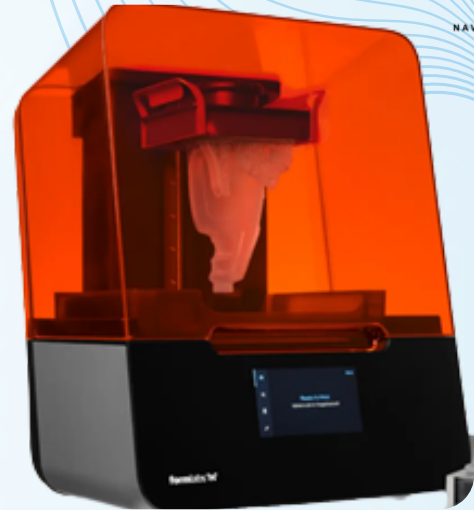

NOTE: Additional 50% shall be given to startups founded/co-founded by **Women, Divyang Jan or Transgender** with more than 26% shareholding or startups having registered offices/operations in Purvanchal and Bundelkhand Regions for both Sustenance Allowance and Seed Capital/Marketing Assistance, or Startups founded/co-founded by persons from Economically Weaker Section (EWS).

- Grant Support upto **Rs. 15 lakhs** for prototype development under the MSME Champions Scheme.
- MSME introduces various theme based participation at every year for students and grass root innovators.
- The NewGen IEDC Programme, launched by the Department of Science & Technology (DST) under the National Science & Technology Entrepreneurship Development Board (NSTEDB) in 2018 for a tenure of five years, aims to promote knowledge-based and technology-driven startups by nurturing young innovators within an academic environment. The programme provides grant support of up to INR **2.5 lakhs** for prototype development.
- ITSEC with DST-Gol support, organizes various training and awareness programs to promote entrepreneurship and startup ecosystem.
- These programs foster innovation among students and grassroots innovators.

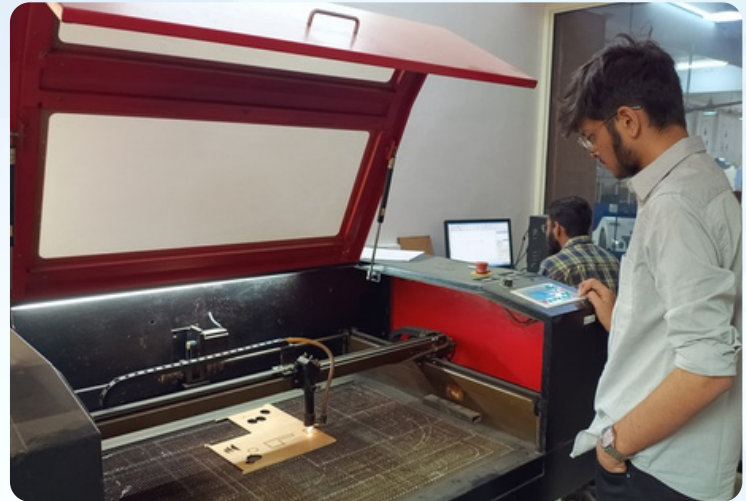

FABRICATION LAB FACILITY

FORMLAB FORM 3+ 3D PRINTER

PLASMA CUTTING MACHINE

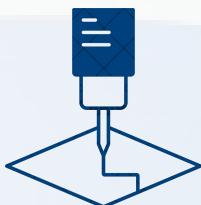

CO2 LASER CUTTING MACHINE

- Co2 Laser Cutting & Engraving Machine
- CNC Plasma Cutting Machine Automation Grade
- Vinyl Cutter and plotter
- Advance Welding Setup
- Dewalts Chop saw Machine
- PLA 3D Printers
- Pratham 3D Printer
- Formlabs Form 3+ SLA Resin 3D Printer
- Deep freezer (-20 deg. Capacity 100L)
- Vacuum Oven (Temp. Range 50-200 Deg. Celsius)
- Well Equipped Water Testing Lab
- Advance Electronics Testing Lab Equipped with

- DC Regulated Power Supply
- Digital Storage Oscilloscope
- Digital Multi-Meter Benchtop
- Drilling Machine Benchtop
- LCR Meter with Q Measurement
- Digital Megger
- Universal Programmer USB Laser Distance Meter
- Coil Winding Machine
- Lux Meter
- High Computational WorkStation (for 3d Modelling, CAD Designing, PCB Designing and AI Model Training)

COMMERCIALIZED MACHINES OF OUR INCUBATION CENTRE

To support startups in affordable prototyping, our incubation centre offers high-end fabrication and 3D printing facilities at a very minimal cost.

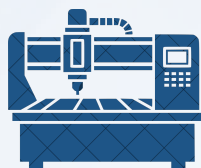

CO2 LASER CUTTING MACHINE:

- **Model No.-MT6040, Working Area (In mm) – 600X400**
- **Laser Tube-90w.**

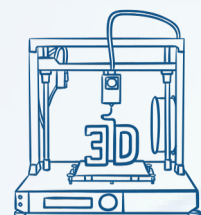

PLASMA CUTTING MACHINE:

- **Fully-automatic, Power: 10 KW, Voltage: 415 V, Frequency: 50 Hz**
- **Table Size: 3200 x 1800 mm**
- **Cutting Thickness: 20 mm**

FORMLABS 3+ SLA 3D PRINTER:

- **BUILD VOLUME:**
5.7 × 5.7 × 7.3 in
- **Stereo Lithography, Industrial Grade**

PIXEL 3D S1 PLA 3D PRINTER:

- **Build Volume:**
230(L)*230(W)*260(H)mm
- **Print Resolution: ± 0.1mm**

FOCUS AREA

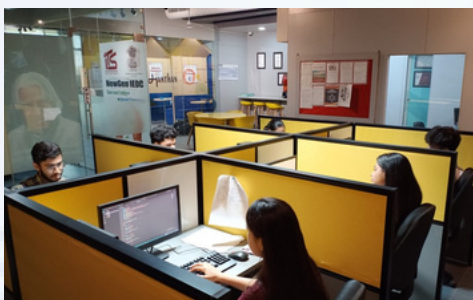

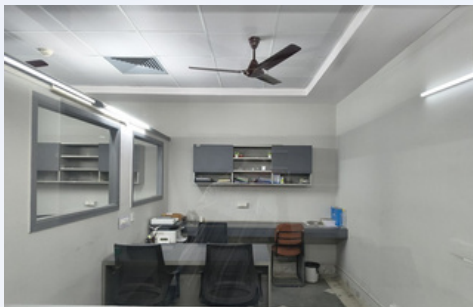

- HealthCare
- IT & Electronics Sector
- AI & Deep Learning
- Drone & Robotics
- Industrial Automation
- Travel & Tourism
- E-Commerce
- Mobile and IT Services
- Internet of things
- EV
- Electronics Design/VLSI design
- Women Empowerment
- Agriculture
- Engineering Design & Manufacturing

INTEL AI SERVER GRADE LABS FOR DEEP- TECH INNOVATIONS

- Intel Xeon Silver 4410Y & Intel Xeon Gold 6430 Processors with up to 32 cores & 64 threads for AI, ML and HPC workloads.
- TruDDR5 4800MHz high-speed memory for faster data processing.
- RAID 540-81 PCIe Gen4 Storage Controller for enhanced reliability and performance.
- Nvidia A40 48GB dual card.

FACILITIES & INFRASTRUCTURE

Dedicated Cabin Space – AC & Non-AC cabins available for startups and innovators.

High-Speed Wi-Fi – Seamless internet connectivity for efficient work.

Dedicated Boardroom – Well-equipped meeting space for discussions and collaborations.

Cafeteria – Refreshments and a comfortable space for networking.

CENTRE OF EXCELLENCE

- SYSCOM Innovation Development Centre
- SMC Pneumatic Centre
- Software Testing Centre
- iOS Development Centre
- Rockwell Automation Centre
- Embedded System and Robotic Centre
- NI innovation Centre and Lab View Academy
- AI – Intel Server System with Nvidia GPU

Our Prominent Projects

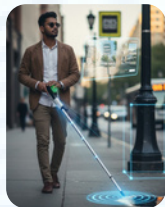

SMART KALAM

A real-time digital pen that uses dot-matrix sensing to instantly convert handwritten content into digital data without the need for special tablets. SmartKalam offers a natural writing experience on low-cost paper, making it ideal for healthcare, education, and governance.

IRON LUNG

IRON LUNG is a smart respiratory training system designed to help people exposed to high levels of air pollution. It aims to strengthen respiratory muscles and improve lung function — helping counteract the negative impact of chronic exposure to particulate matter and pollutants. By providing structured breathing exercises or assisted breathing support, it helps maintain or restore healthy lung mechanics, potentially reducing risks associated with long-term air pollution exposure (e.g., reduced lung capacity, chronic lung disease).

SMART BLIND CANE

A next-generation Smart Blind Cane integrating AI-based object recognition, GPS tracking, GSM communication, and voice-command control to support safe, independent navigation for visually impaired users. It also enables two-way voice communication and automatic emergency alerts with live location sharing.

mmWave

A smart switch integrating mmWave radar to detect presence, occupancy, and vital signs without contact. It combines home automation with passive health monitoring, offering real-time alerts and enhanced safety.

SOILO

Soilo is a portable, AI-powered handheld soil tester that delivers instant, lab-level analysis across nine key soil parameters directly in the field. With GPS tagging, multilingual guidance, and actionable insights, it makes professional soil diagnostics affordable and accessible for farmers, builders, and government users. It is India's first soil testing device which tests 9 parameters like N, P, K, pH, Moisture, EC, Mg, Zn and Temp with single probe and further integrated with AI software for farmer's ease.

INVENTOJOY

Inventojoy offers eco-friendly 3D puzzle sheets that children assemble into toys, blending creativity, learning, and sustainability in a unique play format. It promotes skill development while replacing plastic toys with a safe, educational, and planet-friendly alternative.

Innovation Milestones

The Incubation Centre has successfully developed **94+** prototypes across various technological domains, under **NewGen IEDC** Programme aiding in proof-of-concept validation. A total of **66 patents** have been filed to protect innovative ideas, out of which **8** patents have been granted. The centre has secured **24 LOIs** from industry partners, indicating strong interest in commercializing incubated technologies. **28 student-led** startups have been officially incorporated, fostering young entrepreneurs and transforming academic projects into viable businesses.

Success Stories & Achievements

60+ STARTUPS INCUBATED SUCCESSFULLY

WOMEN-LED STARTUPS RECEIVED INR 41.20 LAKHS UNDER MSME WOMEN IDEA HACKATHON 2023.

**BIGBLARE INNOVATIONS LLP (ALUMNI STARTUP)
WON THE "INNOVATIONS IN PRODUCT
DEVELOPMENT" AWARD.**

**5 STARTUPS SECURED INR 35 LAKHS UNDER
STARTINUP GRANTS.**
